

K-LOVE translator station provides a great service in my local, rural area. I know that I can receive their signal through out my entire area. This station provides a safe, uplifting radio station for my children to listen to and enjoy. If they were to be replaced by a LPFM I would have no other alternatives. It allows many people to receive the same broadcast around the country. I have traveled across the country with my children each of the last 2 summers and I know that because of these repeaters I can listen to the same familiar voices and songs.

There are no other local stations which provide this kind of music or format where my children can safely listen to music and not learn bad words or hear ideas that are sexually explicit. Don't take this kind of station off my air waves please.....
